

## FEATURES

4 heating plates of Carbon heating wires positioned in specific areas identified with support of physicians and physiotherapists to provide the best comfort warming of the body during hours of cold activities.

No electromagnetic fields are generated by the heaters.

3 levels Adjustable temperature.

Rechargeable Lithium battery.

Water Resistant.

## BATTERY

Battery Life is more than 500 full charging cycles.

Charge the batteries until the charger lights turns all on.

The charging time of an empty battery is usually 4÷6 hours.

Connecting the battery to the system starts heating at max power.

4 small LED lights of the battery indicates the current battery capacity that is left.

Heated item not connected: Leds indicate battery status.

4 leds 100%, 3 leds 75%, 2 leds 50%, 1 led 25% On BGF-001 battery model,  
pressing twice the side power button, the light will turn ON/OFF.

## HEATING POWER MANAGEMENT

Battery has an in built power management

Duration varies in function of the battery type.

Example BGF-001:

Press once the side power button:

3 LEDs: MAX POWER – About 4 hours duration

2 LEDs: MAX POWER – About 5.5 hours duration

1 LEDs: MAX POWER – About 8 hours duration

External temperature may affect the battery duration.
